

INTRODUCTION

Hi, this is Alim. I am a developer who wants to pursue a career in the software world. I am dedicated to advancing myself in the software space and working with C#.

SKILLS

- C#
- Asp.net MVC
- .Net Core
- WEB API
- Abp.io(suite)
- Blazor/HTML5/CSS
- SQL
- N-tier Architecture
- Microservice Architecture
- Redis
- Jira
- Gitlab
- Postman

LANGUAGE

- İngilizce B1

ALİM DELİBAŞ

Software Developer

PERSONAL INFORMATION

Nationality : Turkish Republic

Birth Date : 20.04.2000

Nationality : B

EDUCATION

2019- 2025 Computer Engineering

EXPERIENCES

06.2024 – Present İber Teknoloji-Medicana Teknokent-Remote
Software Developer – Health Information Systems

- Developed new services and API endpoints using C#.
- Developed an end-to-end Online Doctor Consultation (Online Visit) module using .NET and Blazor within the Enzim HBYS ecosystem.
- Built modular backend services and REST APIs on top of the ABP Framework, following layered/N-tier architecture principles.
- Integrated the module with Enzim HBYS (Hospital Information System) to securely exchange patient, physician, and appointment data.
- Designed new SQL Server database tables and implemented complex data retrieval, insertion, and update operations for appointments, payments, and medical records.
- Implemented full integrations with BigBlueButton (BBB) and Zoom for real-time online consultations, including session creation, status tracking, and error handling.

- Integrated the lyzico payment gateway to handle secure online payments, refunds, and payment status synchronization with the hospital system.
- Developed multilingual UI and parameter-driven configuration (e.g., cancellation rules, interpreter notification templates, language preferences) to support international patients.
- Implemented workflows for assigning interpreters based on selected consultation language and automated email notifications to registered interpreters.
- Enabled patients to upload medical documents (discharge reports, test results, etc.) before the online visit and made them available to physicians through the system.
- Developed an admin panel for hospital staff to manage online appointments, payments, user accounts (patients/physicians/interpreters), and system parameters.
- Ensured security, auditability, and data privacy in line with Turkish Ministry of Health regulations, including detailed logging of NFC-free online operations and error reasons.

02.2023 – 06.2024 Süleyman Demirel University Merkez,Isparta
IT Department
IT Assistant

- Joined user computers and devices to the Windows domain and ensured proper access to network resources.
- Assisted in the installation and configuration of network switches and basic LAN infrastructure.
- Supported network monitoring and troubleshooting tasks to help maintain stable and secure connectivity on campus.
- Collaborated with the IT team on day-to-day technical support for staff and students.

07.2023 – 09.2023 IDE Yazılım Donanım Bil. Çankaya,Ankara
Intern

- Assisted in setting up and managing virtual machines using VMware virtualization platforms.
- Gained hands-on exposure to physical and virtual server environments in the data center.
- Supported basic server administration tasks such as OS installation, resource monitoring, and simple troubleshooting under supervision.
- Improved understanding of core infrastructure concepts, including virtualization, networking, and system security basics.
