Summary

With over 10 years of experience in software development and technical roles.

I'm a Software Developer and Founder of HerkeseWeb, with over 13 years of experience in software development. I specialize in Strapi CMS, including custom plugin development, and I also work extensively with ASP.NET, Vue.js, Next.js, and React.

I offer freelance and remote development services for startups, agencies, and businesses looking for scalable, high-performance web applications. I focus on clean, maintainable code and solutions tailored to your specific needs.

My expertise spans full-stack development, system architecture, and cross-functional team collaboration, as well as hands-on experience with OpenAI's API and advanced AI technologies.

Git, Tfs, GitHub, Gitlab, JsFiddle, Codepen

Slack, Trello, MS Planner, Bitrix, Jira, linear

Strapi CMS, Directus CMS

IIS on Windows Server, Windows Server Management, Hosting Management
(Cpanel, Plesk.)

EXPERIENCES

HerkeseWeb (Founder) - Software Developer & System Architect

Strapi CMS based with [Asp.Net](#) project.

I have developed a proprietary software platform that enables the creation of fully unique and customized websites within just a few hours.

This innovation significantly reduces the time, effort, and development costs typically associated with web design and deployment.

Beyond standard websites, the platform also supports advanced modules such as e-commerce infrastructure, hotel reservation systems, and other scalable business solutions that can be easily activated and integrated.

Even during the beta testing phase, the system has already been adopted by 9 active clients, successfully helping them digitize and grow their businesses.

HerkeseWeb - Own Startup www.herkeseweb.com 

Türkçe: HerkeseWeb, fikirlerinizi dijital dünyaya taşıma (yani bir web uygulaması geliştirme) sürecini dakikalara indiren akıllı bir web uygulama platformudur.

E-ticaret, rezervasyon veya kurumsal çözümler fark etmeksizin; geliştirme (development), sunucu yönetimi (hosting) ve yayına alma (deployment) gibi karmaşık süreçleri tamamen ortadan kaldırır.

Bu sistemle teknik detaylar, yüksek maliyetler ve zaman kayıplarıyla uğraşmak yerine, sadece işinize odaklanırsınız. HerkeseWeb, profesyonel bir dijital varlık oluşturmak için gereken tüm altyapıyı hazır sunarak, projenizi en hızlı ve en verimli şekilde hayata geçirmenizi sağlar.

English: HerkeseWeb is a smart platform that turns your ideas into web applications in just minutes. Whether you need an e-commerce site, a booking system, or a corporate website, it removes all the complex steps like development, hosting, and deployment.

Instead of dealing with technical details, high costs, and time loss, you can simply focus on your business. HerkeseWeb provides all the infrastructure you need to launch your professional project in the fastest and most efficient way.
