Manual Testing

Sait SOYTÜRK

Software QA Engineer at Logo Yazılım via D1-Tech
Istanbul, Türkiye

Summary

As a Software QA Engineer at Logo Yazılım, I contribute to delivering high-quality software solutions by leveraging my expertise in manual testing, REST APIs, and test automation. My work focuses on ensuring the reliability and functionality of applications through rigorous testing processes. I am an expert in testing fintech projects, with proven experience ensuring quality, security, and regulatory compliance to deliver reliable and scalable financial solutions. Test Automation Specialist with hands-on experience in automating functional, regression, and API tests for fintech platforms.

With over five years of software quality assurance experience, I have developed and implemented testing strategies for client/server, desktop, and web-based applications. My commitment to detail and quality drives my contributions to the software development lifecycle, from testing frameworks to API validation, ensuring seamless functionality and user satisfaction.
