PROFILE

Computer Engineering graduate specializing in Java backend development. Experienced in building RESTful APIs using Java Spring Boot and working with relational databases and backend data services. Strong background in object-oriented programming, algorithms, and database-driven application design. Developed an AI-powered medical image analysis project using Python and deep learning, with hands-on experience in backend systems. Seeking to contribute to scalable and reliable enterprise software solutions.

EXPERIENCE

08/2024 - 09/2024

iOS Developer Intern – Enoca

Contributed to the development of a Swift-based iOS application, working with RESTful APIs and mobile application workflows.

PROJECTS

09/2024 - 06/2025

AI-Based Tomographic Image Analysis System (Graduation Project)

- Developed an AI-powered web platform to analyze brain MRIs for tumor detection, segmentation (U-Net), and classification. Used Python, Flask, TensorFlow, and SQL.

08/2024 - 09/2024

iOS Movie Tracker App – Internship (Enoca)

- Developed a Swift-based iOS application using the TMDB API to list and display movie and TV content
- Implemented search, user profile, and favorites features
- Integrated RESTful APIs and followed MVC-based mobile architecture

04/2023 - 07/2023

Sahne Sende – Android Mobile Application

- Designed and developed an Android mobile application using Java and Firebase that connects charitable organizations with amateur artists, enabling event creation and participation through a mobile platform.

EDUCATION

2021 - 2025

Bolu Abant Izzet Baysal University

Bachelor's in Computer Engineering (GPA: 3.35 / 4.00)

2016 - 2020

Darica Science High School

SKILLS

- Java (Spring Boot)
- RESTful APIs
- MySQL / PostgreSQL
- Docker
- Git / Github
- Jira / Trello
- English – B1 (Intermediate)
