WORK EXPERIENCE

İller Bankası A.Ş.

07.2024-08.2024

Back-End Developer Internship

- Worked with my team to create an earthquake alert application for company employees, delivering real-time notifications and comprehensive earthquake information specific to their locations.
- Java, Spring, Spring Boot, SQLite, H2 Database

Inntech Yazılım

07.2023-10.2023

Full-Stack Developer Internship

- Collaborated with my team to develop a real-time web application for monitoring smoke detector data in an indoor environment, featuring a responsive user interface and real-time data visualization.
- ASP.NET MVC

EDUCATION

Mersin University Bachelor's Degree in

2018 - 2025

Computer Engineering

3.12/4.00

CERTIFICATES & TRAININGS

Turkcell Geleceği Yazanlar 4.5 Java Bootcamp

08.2025 - 10.2025

Instructors: Engin Demiroğ, Halit Enes Kalaycı

Intensive training program focusing on Java, Spring Boot, and real-world project development practices

PROJECTS

Ship and Port Tracking Automation

- Developed a ship port tracking automation system that monitors real-time ship entries and exits, cargo details, and the ports where the ships are located, providing a user-friendly interface for efficient port operations.
- ASP.NET MVC, Bootstrap

QR MENU and Cafe Reservation

- Contributed to the front-end development of a QR code-based menu application, allowing users to scan QR codes to view menus, make reservations, and complete payments in cafes.
- React, HTML, CSS, JavaScript, NextJS

Movie App

- Developed a Netflix clone application, allowing users to browse and stream movies and TV shows with features such as content categorization, user authentication, and playback functionality.
- React, HTML, CSS, JavaScript, NodeJS
