

İbrahim Halil AYTEKİN

Full Stack Developer | Software Engineer

I am a Full Stack Developer focused on continuously learning new skills and improving myself.

I worked for three years at **Byte Software Technology Consulting** as a **Sales Consultant**, where I developed strong communication and analytical skills. Later, I joined a **construction company**, managing **CRM systems**, handling **cost calculations**, and analyzing **income/expense balances**.

Afterward, I decided to return to my engineering background and completed the **6-month intensive Workintech Full Stack Development Program**, where I strengthened my knowledge in both **front-end** and **back-end development**.

Personal Info

Address

Gaziantep, Şahinbey

2012 - 2018

Languages

English, Intermediate
Turkish, Native

Certificates

Front End Development, Workintech,
09.2025

Full Stack Development, Workintech,
11.2025

SKILLS

Front End: Javascript, React.js, Hooks, Context API, Redux, Axios, Yup, Jest, Cypress, HTML, CSS, Tailwind Css,

Back End: Java, OOP, Data Structures, Design Patterns, Maven, Spring Core, Spring Boot, Spring Data JPA, Spring Security, SQL, PostgreSQL, JUnit, Mockito, Git, .Net

Additional: Algorithms, Debugging, Deployment, Problem Solving, Figma, Teamwork

SOFTWARE PROJECTS

 **E-Commerce Platform , Full Stack Dev. - Java(Spring Boot)| React | JavaScript| SQL | REST API** [GitHub](#)

- A large-scale e-commerce website that allows users to interactively browse products, add them to their cart, and complete purchases through a seamless and user-friendly interface.

 **Pizza Ordering App, Full Stack Dev. - React | JavaScript** [GitHub](#)

- Developed a full-stack pizza ordering application featuring dynamic menus, customizable orders, and integrated payment flow using modern web technologies
- Implemented real-time order tracking and a responsive UI to ensure a seamless experience across all devices.

 **WitFlix – Movie Streaming App Full Stack Developer - React | CSS | JavaScript** [GitHub](#)

- Developed a responsive movie streaming platform where users can browse films, view details, and explore genres with a modern Netflix-style UI.
- Focused on clean design, dynamic content rendering, and component-based architecture using React.

 **Twitter Clone App** , Full Stack Dev. Java (Spring Boot) | React | SQL | REST API | [GitHub](#)

- End-to-End Social Media Platform: Developed a full-stack microblogging application featuring real-time user interactions, tweeting capabilities, and follower management systems.
- Robust Backend & Security: Architected a scalable RESTful API using Spring Boot, integrated SQL for persistent data storage, and implemented industry-standard security protocols.
- Clean Code & Architecture: Built with a strong emphasis on SOLID principles and layered architecture to ensure modularity, high performance, and ease of maintenance.

EXPERIENCE
