WORK EXPERIENCE

Software Engineer, ASELSAN via Simsoft Computer Technologies

2025

-At the ASELSAN Gölbaşı campus, I am working on an innovative test automation platform developed in-house with the ASELSAN team. This platform is built on a microservices architecture and utilizes React (web & extension), Node.js (Express), Prisma ORM, PostgreSQL, KafkaJS, and WebSocket technologies.

Software Developer, Alfa Çözüm

2023 – June 2025

-As part of the Warehouse Management System project, I worked on the entire operational workflow of a warehouse, using Spring Boot for the back-end, React for the front-end, and React Native for the mobile application. I contributed to features such as pallet creation, defining pallet contents, pallet transfer, authorization, and reporting.- Throughout this process, I made significant contributions to the development of ERP systems for well-known companies. I developed professional software solutions for departments such as Sales, Planning, and Human Resources
