SUMMARY

Full Stack Engineer with 2+ years of experience building scalable web applications and microservices. Started at Sarıtaş Bilişim during my 3rd year of university, progressing from part-time developer to team lead, and completed a post-graduation internship at the parent company's Germany office (4Grands GmbH). End-to-end ownership from architecture design to deployment: implementing frontend designs and backend APIs, managing infrastructure, and automating deployments using GitLab CI/CD, Docker, Helm, and Kubernetes. Proven track record of optimizing system performance (40%+ response time improvements) and delivering production-ready solutions with Spring Boot, React, and cloud technologies.

TECHNICAL SKILLS

Languages | Java, Python, JavaScript, TypeScript, HTML, CSS, SCSS
Frontend | React, Angular, React Native, Ionic, Expo, Tamagui, Bootstrap, Tailwind, Shadcn
Backend | Spring Boot, Spring Cloud, Django, Node.js, REST APIs, GraphQL, WebSockets, Webhooks
Databases | PostgreSQL, MongoDB, Redis
Message Queues & Event Streaming | RabbitMQ, Kafka
Microservices & Integration | Spring Cloud Gateway, Eureka Server, OpenFeign, JWT, OAuth2
Cloud Platforms | AWS (S3, SES), Azure (Entra ID, Blob Storage), Digital Ocean
DevOps & CI/CD | Docker, Kubernetes, Helm, GitLab CI/CD, Git
Monitoring & Observability | Micrometer, Zipkin, ELK Stack, Power BI
Testing & Tools | JUnit, Flyway, JSoup, Jira, Figma

EXPERIENCE

E.ON Digital Technology GmbH — via Sarıtaş Bilişim (External Engineer) Dortmund, Germany (Hybrid)

Full Stack Engineer 04/2025 - Present
ESPresso Spring Boot | React | Azure | PowerBI | Gitlab CI/CD | Jira | Docker | Kubernetes | Helm

- Architected and developed ESPresso, an internal web application for managing and monitoring company-wide licenses and services, improving visibility and cost tracking
- Built scalable backend services with Spring Boot and modern React frontend, implementing CI/CD pipelines with GitLab for automated testing and deployment
- Configured Azure services for security, monitoring, and cloud infrastructure, ensuring high availability and compliance standards

ESP-OWL Spring Boot | Python | React | PowerBI | Azure | Gitlab CI/CD | Blob Storage

- Maintained and enhanced a cost calculation and KPI system tracking all licensing and service costs across E.ON Digital Technology GmbH
- Automated data processing workflows with Python scripts in GitLab CI pipelines, extracting and analyzing data from multiple sources to support business intelligence
- Migrated legacy web application to Power BI, building React/Spring Boot interfaces for data visualization and implementing automated data refresh pipelines for real-time insights

Sarıtaş Bilişim Antalya, Turkey (Hybrid)

Full Stack Developer and Team Lead 12/2024 - 04/2025
otel-ihitiyac.com Spring Boot | Angular | React | MongoDB | AWS(S3, SES) | JSoup | Kubernetes | RabbitMQ | Redis

- Led project management, roadmapping, and design reviews, establishing efficient development workflows and ensuring high-quality deliverables
- Designed and implemented a Redis-backed cache manager for microservices, reducing API response time by 40% and cutting database load by 50%
- Integrated RabbitMQ and OpenFeign to enable asynchronous inter-service communication, improving system throughput for order processing and notification delivery
- Orchestrated DevOps infrastructure using Docker, Kubernetes, and GitLab CI/CD, streamlining deployment processes and reducing deployment time

- Architected and developed multiple sub-projects using React (Shadcn) and Angular (Ionic), selecting optimal technology stacks based on project requirements

Full Stack Developer (Part-Time)

10/2023 - 12/2024

otel-ihitiyac.com

Spring Boot | Angular | TypeScript | MongoDB | Ionic Framework | AWS(S3, SES) | JSoup | Kubernetes

- Transformed Figma designs into responsive, production-ready web applications using Ionic and Angular, ensuring pixel-perfect implementation and optimal user experience
- Optimized backend performance with Spring Boot and MongoDB, reducing query times from ~5s to <300ms (94% improvement) across the entire application
- Built and maintained robust web scrapers using JSoup with efficient parsing algorithms, ensuring accurate and timely data retrieval that improved data integrity and user experience

PROJECTS

Foodagram

02/2025 - 06/2025

Source Code

Spring Boot | Django | React Native | RabbitMQ | Redis | JWT | Spring Cloud

- Architected and developed Foodagram, a full-stack social media platform as a senior capstone project, implementing microservices architecture with Spring Boot, Django, React Native, MongoDB, and PostgreSQL
- Built a cross-platform mobile application using React Native, Expo, and Tamagui with real-time notifications and responsive UI components, ensuring seamless user experience across iOS and Android
- Designed and implemented scalable microservices (authentication, user management, content management, notifications) with Spring Cloud API Gateway and Eureka Server, integrated Redis caching for performance optimization, and developed an AI-powered service using Django

EDUCATION

Antalya Bilim University - Bachelors of Engineering, Computer Engineering 3.45/4.00

09/2021 - 06/2025

LANGUAGES

Turkish - Native | English - C2 (EF SET Certificate – 79/100) | German - A2
