PROJECTS

SMAx INNOVA, ANKARA
MOBILE APPLICATION 10/2024-PRESENT

Developed a mobile application integrated with the company's **ITSM (IT Service Management)** platform to enable field teams to manage, update, and close assigned service tasks on-site.

Tech Stack: Flutter (Dart), MVVM architecture, MobX & Provider for state management, Dio for RESTful API communication.

- Built and maintained scalable MVVM-based architecture.
- Integrated ITSM APIs for real-time task synchronization and updates.
- Implemented reactive state management using MobX and Provider.
- Developed form handling and PDF export features for task closure.
- Improved performance and UI/UX consistency across modules.

İTTS INNOVA, ANKARA
WEB APPLICATION 10/2024-PRESENT

Contributed to the development of an internal tender management and subcontractor assignment system enabling the company to open tasks for bidding and assign work based on submitted offers.

Tech Stack: React, TypeScript, RESTful API integration.

- Developed responsive and user-friendly UI components using React and TypeScript. Java Spring Boot for backend and maintainable code architecture.

- Designed and implemented intuitive page layouts to enhance user navigation and overall experience.

ITTOOLS**INNOVA, ANKARA****WEB APPLICATION****07/2025-11/2025**

Developed a web application integrated with the company's ITSM task management system to automatically calculate and report monthly payments based on completed service tasks and contract items.

Tech Stack: React (JavaScript), Express.js, SQL Server, Axios for HTTP requests, JWT authentication.

- Designed and implemented RESTful APIs using Express.js and SQL Server.
- Built React interfaces for authorized service providers to track and report completed tasks.
- Integrated ITSM APIs for automated task retrieval and contract-based calculations.
- Implemented JWT-based authentication and secure role-based access control.
- Developed reporting modules for monthly payment summaries and performance insights.
