PERSONAL INFORMATION

I graduated from Cumhuriyet University this year and completed my graduation in December. In my courses, I usually focus on the backend aspect of development. I have primarily used Java and Spring Boot in my projects.

The technologies and programming languages I have experience with include Java, Spring Boot, RESTful Web Services, Spring MVC, Hibernate, MySQL, JPA, Angular (Beginner), ReactJS (Beginner), HTML5 (Beginner), and CSS3 (Beginner).

PROGRAMMING LANGUAGES

- **Beginner** : Angular, ReactJS, HTML5, CSS3, Python
- **Mid-Level** : Java, Spring Boot, Hibernate, JPA, Restful Web Services, Microservices, MySQL

EXPERIENCE

Yazılım Geliştirme 10.2024 - 12.2024

Comport Yazılım Ve Sanayi Anonim Şirketi

Prof. Dr. Yakup Kutlu

- I developed RESTful web services using the Spring Boot framework. In the project, I designed and implemented core back-end functionalities such as user operations, data management, and API integration. By working with a layered architecture and database connections, I created sustainable and scalable solutions.

PROJECTS

- Social Media Application (Instagram Clone)
- Smart Home System Design and Coding for Hackathon Exam
- Crypto Trading Application
- Online Food Ordering Application
- Pharmacy Management Application
- Automatic Timetable Generator Using Genetic Algorithm (Graduation Thesis)
