Bornova/İzmir

About Me

I am a newly graduated Computer Engineer with full-stack development skills, primarily focused on Java Spring Boot and React. Through my corporate internship experience, I gained hands-on experience in microservice architecture, REST API development, database operations, test automation with Karate API, and frontend-backend integration. I am familiar with agile methodologies, possess strong analytical thinking skills, and aim to create value as a full-stack developer.

Technical Skills

- Java & Spring Boot
- REST API Development
- JUnit 5 & Mockito
- React.js
- Microservice Architecture
- Karate API Testing
- SQL / Oracle
- Git
- API Integration (Axios / Fetch)

Education

- Ege University – Electrical & Electronics Engineering 2018-2020
- Ege University – Computer Engineering (Bachelor's Degree, Graduate) 2020-2025

Experience

Software Engineer Intern – Yapi Kredi Technology

- February 2025 – January 2026 (Remote)
- Supported microservice development processes using Java Spring Boot; worked on REST API design and service integrations.
- Contributed to the development of front-end components for parameter management screens and API integrations using React.js.
- Validated backend functionalities by preparing Karate API and JUnit 5 test scenarios; tested records on Oracle databases through DB verification steps.

Software Engineer Intern – Eras Mekatronik A.Ş.

August 2023 – September 2023 | İzmir, Türkiye

- Contributed to the development and testing of small-scale modules by supporting basic software development processes.
- Gained foundational experience in technical documentation and software development workflows.
