EXPERIENCE AND PROJECTS

Pet Map – 2024 November 2025 April

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, MySQL, Google OAuth, JWT, OpenCV, TensorFlow.js, Bootstrap, Nodemailer

I developed a web platform that matches lost pets' photos with AI, including adoption and vet appointment modules. I provided lost pet matches using image processing (OpenCV) and similarity analysis using TensorFlow.js. I provided end-to-end user management including Google OAuth, email verification and admin panel.

FarmerEye – 2023 November 2024 January

The Electronic Observation and Control System introduces a groundbreaking technology that smartens and enhances agriculture. This system provides a powerful tool for agricultural experts and farmers to increase efficiency.

ResquBase – 2023 March 2023 June

ResQBase is an innovative emergency aid database platform that swiftly connects individuals in need, volunteers ready to provide physical support, and generous donors.

Unity Game Development – 2022-2023

Labirent Macerası – Entertainment game
Kolaydan Zora Dört İşlem – Educational Game

EDUCATION AND TRAINING

Next.js & React

Artificial Intelligence and Entrepreneurship

git Structure and Version Controls

Computer Vision with TensorFlow - OpenCV for Beginners (with Python)

Python Programming from Scratch to Advanced

Android Mobil Uygulama Kursu: Kotlin & Java

Bachelor degree-Ankara Yıldırım Beyazıt University

Management of Information Systems [2020 -Current]

SKILLS

- Python + OPENCV, Pillow (PIL), NumPy, Pandas, TensorFlow, MNIST, (ImageDataGenerator), YOLOv5
- SQL
- HTML/CSS-Bootstrap 5, React Router, Context API, GitHub Pages
- Java
- Microsoft Office (Excel , PPT, WORD)

LANGUAGE

English - Intermediate
