PROFILE

I have experience customizing corporate website interfaces and designing user-friendly, responsive interfaces using JavaScript, React.js, Tailwind, and Bootstrap. I have also enhanced my backend skills through Java and Spring Boot training and now wish to continue my career as a Java Backend Developer or Full Stack Developer.

EDUCATION

Inonu University

Computer Engineering
2017 - 2022

SKILLS

- Java
- Spring Boot
- Spring Data JPA
- Rest Api
- WebClient
- Spring Security & JWT
- Spring Cloud
- Microservices
- Eureka
- API Gateway
- Redis
- RabbitMQ
- Docker
- Postman - Swagger
- JavaScript
- React - Next.js
- Tailwind - Bootstrap
- GitHub - JIRA
- PostgreSQL - MySql
- JUnit & Mockito

PROFESSIONAL EXPERIENCE

Freelance Software Developer | January 2025 - December 2025

- As a freelancer, I have worked on the front end of various web development projects.
- Pazaryeri Converter (Project Based , Ankara/Türkiye) - I made improvements to the frontend of the e-commerce platform using React, Next.js

Software Developer (Contract / Project-Based) | July 2024 - September 2024

BlocKeyfi - Glasgow/UK

- I participated in frontend development work in the in-house project.
- I designed user-friendly interfaces using Next.js and Tailwind CSS.
- I optimized mobile compatibility and overall performance.

Intern - Bootcamp | November 2023 - March 2024

Uretken Academy

- I developed front-end skills by creating dynamic, mobile-friendly interfaces using React.js

Intern - Bootcamp | January 2023 - March 2023

Patika. dev

- I gained experience in Spring Boot, JPA, and multilayered architecture using PostgreSQL.

Web Developer | July 2022 - November 2023

Nettabox Software - Türkiye

- I have developed many corporate websites during my work, using JavaScript, HTML, CSS, and Bootstrap.

Front-End Developer Intern | April 2022 - June 2022

Iconium Software - Türkiye

- I learned how to effectively create responsive interfaces.

Software Developer Intern | June 2021 - September 2021

Bera R&D Software - Türkiye

- During my engineering internship, I developed a front-end project using JavaScript and Bootstrap and also gained hands-on experience in back-end development.

PROJECTS

Flight Reservation System - <https://github.com/Nurvural/flight-reservation-system>

- Technologies: Java 21 / Spring Boot / Microservices / Spring Cloud (Eureka, API Gateway) / JWT & Spring Security / Redis / Spring Cache / SLF4J / Logback

Inventory Tracking System - <https://github.com/Nurvural/inventory-tracking-system>

- Technologies: Java 21 / Spring Boot / JPA & Hibernate / JWT & Spring Security / MapStruct / SLF4J / Logback / PostgreSQL / JUnit & Mockito / Docker / Prometheus / Grafana / RabbitMQ

Weather App - <https://github.com/Nurvural/weather-app/tree/main>

- Technologies: Java 21 / Spring Boot / RabbitMQ / JUnit / Mockito / SLF4J / Logback

Hospital Management (Java) - <https://github.com/Nurvural/hastane>

To Do App (React.js) - <https://github.com/Nurvural/to-do-app>

MovieApp (Spring Boot) - <https://github.com/Nurvural/movieApp/tree/main/src>
