SUMMARY

Fourth-year MIS student with hands-on experience in ERP front-end development using Vue.js and Tailwind CSS. Currently strengthening my backend skills with C#/NET and microservices fundamentals (REST APIs, Docker basics). I work fast by clarifying requirements, breaking tasks down, and delivering maintainable solutions.

WORK EXPERIENCE

Software Developer / 09.2025-12.2025 (WEEC Teknoloji)

- As a part-time Software Developer at WEEC Teknoloji, I played an active role in designing, developing, and improving ERP system UI screens using Vue.js, Tailwind CSS, HTML, CSS, and JavaScript. As part of this work, I strengthened the integration between the user interface and the data layer by organizing front-end data flows, including designing and updating DTO-based data models to ensure consistent and maintainable communication between the UI and backend services.
- In addition, I supported requirement analysis by participating in client meetings and prepared project management deliverables such as pricing proposals, conceptual designs, and documentation covering project scope and planning. I also contributed to process tracking through Jira and supported sprint-based progress by working within a Scrum approach, helping with work breakdown, task management, and coordination between technical teams and business stakeholders.

Intern Software Developer/ 07.2025-09.2025 (WEEC Teknoloji)

- As an intern at WEEC Teknoloji, I contributed to the development of web interfaces using Vue.js and Tailwind CSS, working on component-based UI improvements and responsive design updates. In parallel, I attended customer and internal team meetings to capture requirements, document key decisions, and provide structured feedback to help clarify technical needs and support the development process.

Intern Business Developer / 12.2024-02.2025 (Locomar)

- Cold mail, digital marketing, cold call.

EDUCATION

BSc, Management Information Systems — Ankara Hacı Bayram Veli University

2022 – Present (Expected 2026)

- I am a fourth-year Management Information Systems student at Ankara Hacı Bayram Veli University. I led the establishment of the department's student community and served as its president for four semesters, overseeing event planning, team coordination, and stakeholder communication.

SKILLS

Frontend: Vue.js, Tailwind CSS, JavaScript, HTML5, CSS3 / **Tools:** Git, Jira / **Methodologies:** Scrum /
Backend (learning): C#, .NET, Microservices, REST APIs
