About Me

As a 3rd year Software Engineering student passionate about UI/UX design, I combine strong technical foundations with creative design thinking. I specialize in creating intuitive and visually appealing digital experiences that users love. Currently seeking an internship opportunity to apply my skills and grow as a designer.

My unique approach bridges aesthetic sensibility with engineering principles, allowing me to design with both user experience and technical implementation in mind. This dual perspective enables me to create designs that are not only beautiful but also feasible and efficient to develop.

Education

Bachelor of Science in Software Engineering

İnönü University

Relevant coursework: Human-Computer Interaction, Web Design, Database Systems, Algorithms

Skills

Figma

UI Design

Wireframing

Projects

Mobile Banking App Redesign

Redesigned the user flow and interface for a banking app to improve usability and accessibility.
