

AKGUN Patient Portal

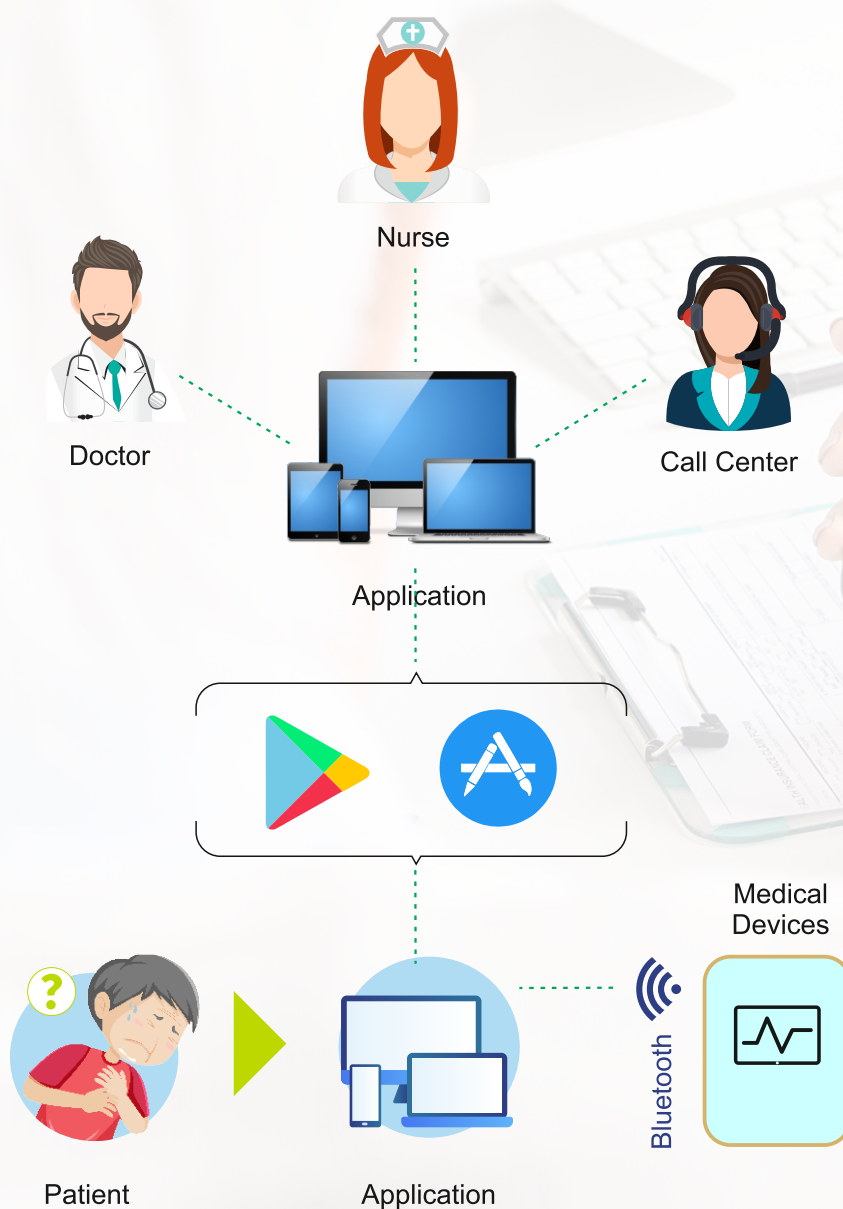

**Every Minute Counts in Health,
Do Not Waste Time for Your Health**

AKGUN Patient Portal

It is a patient-oriented mobile application developed for patients receiving service from health institutions to follow sessions, appointments, examination results and vitals outside the hospital, and to communicate with their physicians.

General Scope

- ◆ Patients who download the mobile application to their phones will be able to perform all their procedures from anywhere, monitor their vitals instantly, connect their medical devices, and view and share their health information.
- ◆ Healthcare personnel will be able to quickly access patient's information outside the hospital and contact with their patients via this application.
